Magnolia Menopause

Your Personalized Protocol

Your Menopause Type:

The Fading Glow

"Your radiance isn't gone — it's waiting for the right support."

What's Happening in Your Body

- Your dominant symptoms are driven by declining collagen production and shifting hormonal balance.
- Estrogen is a key regulator of collagen synthesis, skin hydration, and hair follicle cycling.
- As it declines, you may notice drier skin, thinning hair, joint stiffness, and vaginal dryness.
- Simultaneously, cortisol and mood disruption are affecting how you feel in your own body.
- You need deep nourishment — both structural (collagen, hyaluronic acid) and hormonal (adaptogens that support balance from within).

The Ancient Herbs That Match Your Type

Shatavari (Asparagus racemosus)

Ayurveda — used for 3,500+ years

The ultimate women's reproductive tonic. Supports estrogen and progesterone balance, reduces vaginal dryness, and nourishes mucous membranes throughout your body. Its mucilaginous properties provide a soothing, moisturizing effect from the inside out.

Schisandra Berry (Wu Wei Zi)

Chinese Medicine — used for 2,000+ years

Known as the ‘five-flavour fruit’ because it contains sweet, sour, salty, bitter, and pungent tastes. A potent adaptogen that supports liver detoxification — critical for hormonal metabolism— and has been treasured in TCM for centuries for maintaining radiant, youthful skin.

White Peony Root (Bai Shao)

Chinese Medicine — used for 1,800+ years

A classical blood-nourishing herb found in women’s formulas throughout TCM history. Relaxes muscles, supports liver function, and helps balance hormones. Mildly sweet and gentle — it’s been used in beauty formulas for centuries because healthy blood equals radiant skin.

Ashwagandha KSM-66®

Ayurveda — used for 3,000+ years

The gold standard adaptogen extract. Clinically shown to reduce cortisol by 28% and support thyroid function. When cortisol is chronically elevated (common in menopause), it accelerates skin aging, hair loss, and muscle breakdown. Ashwagandha addresses the root cause.

Your Daily Ritual

- Mix one scoop of Magnolia Glow into 250ml cold or room-temperature water, a smoothie, or iced tea every morning.
- Drink as your first act of self-care each day.
- The rose water flavor with subtle berry notes from schisandra and goji makes this feel like a spa drink, not a supplement.
- Follow with a collagen-supporting breakfast: eggs, berries, citrus, or avocado.

Dietary Recommendations

- Eat collagen-supporting foods daily: bone broth, sardines, eggs, citrus fruits, bell peppers, and dark leafy greens.
- Add healthy fats to every meal: avocado, olive oil, walnuts, salmon. *Your skin needs fatty acids to maintain its moisture barrier.*
- Eat phytoestrogen-rich foods: ground flaxseed, edamame, chickpeas, sesame seeds. *These provide gentle plant-based hormonal support.*

- Reduce sugar and refined carbs — *glycation (sugar bonding to collagen fibers) accelerates skin aging during menopause.*
- Eat fermented foods daily: yogurt, kimchi, sauerkraut, miso. *Gut health directly affects skin clarity and nutrient absorption.*

Your 7-Day Starter Plan

"One small step each day"

Day 1: Start your morning with Magnolia Glow mixed into water or a smoothie. Notice the delicate rose-berry flavour.

Day 2: Add vitamin C-rich foods to every meal today: citrus, bell peppers, strawberries. Vitamin C is essential for your body to actually synthesize collagen.

Day 3: Hydrate intentionally — aim for 2.5L of water today. Hyaluronic acid works best when your body is well-hydrated from the inside.

Day 4: Swap your morning coffee for green tea. The L-theanine supports calm focus while the antioxidants protect skin from oxidative stress.

Day 5: Do 10 minutes of gentle stretching or yoga. Schisandra and white peony support joint flexibility, but movement activates their benefits.

Day 6: Apply a hyaluronic acid serum after washing your face tonight. Support your skin from inside (Magnolia Glow) and outside simultaneously.

Day 7: Take a progress photo in natural light. Collagen changes are subtle but cumulative —you'll want a baseline to compare at 30 and 60 days.

Magnolia — Personalized Protocol

Recommended for your type:

Magnolia Glow

Rose Water — marine collagen peptides, ashwagandha, shatavari, schisandra, goji berry, white peony, hyaluronic acid, and biotin.
