Magnolia Menopause

Your Personalized Protocol

Your Menopause Type:

The Foggy Mind

"Your brain isn't broken — it's under-supported."

What's Happening in Your Body

- Your dominant symptoms center on cognitive function, mental energy, and motivation.
- Declining estrogen directly affects your hippocampus (memory center), prefrontal cortex (focus and decision-making), and neurotransmitter production (dopamine, serotonin, acetylcholine).
- The result: brain fog, word-finding difficulty, lost keys, forgotten names, and a persistent feeling of mental fatigue that no amount of coffee fixes.
- You need ingredients that support neuroplasticity, nerve growth, and cellular energy production — not stimulants.

The Ancient Herbs That Match Your Type

Lion's Mane Mushroom (Hericium erinaceus)

Chinese Medicine — used for 1,000+ years

One of the only natural substances known to stimulate Nerve Growth Factor (NGF) production— literally helping your brain build new neural connections. Clinically shown to improve memory, focus, and mild cognitive impairment. TCM calls it the 'monkey head mushroom' and prizes it as a brain tonic.

Gotu Kola (Centella asiatica)

Ayurveda — used for 3,000+ years

Ayurveda's number one brain herb, known as 'Brahmi of the south.' Used for centuries to enhance memory, concentration, and neural regeneration. Also supports circulation to the brain and collagen production. In Ayurvedic tradition, it's considered a 'medhya rasayana' — a rejuvenative, specifically for the mind.

Cordyceps Mushroom (Cordyceps militaris)

Chinese Medicine — used for 1,500+ years

TCM's premier energy tonic. Unlike caffeine, which borrows energy from later, cordyceps increases ATP production at the cellular level — giving you genuine, sustained physical and mental energy. Supports oxygen utilization in your brain and muscles.

Rhodiola Rosea

Siberian and TCM tradition

A powerful adaptogen that combats mental fatigue, improves attention span, and supports sustained cognitive energy without stimulation. Clinically shown to reduce burnout and improve performance under stress. Its mild rose-like flavor gave it its name.

Your Daily Ritual

- Mix one scoop of Magnolia Mind into 250ml cold water, sparkling water, juice, or a smoothie in the morning or early afternoon.
- Drink during your most cognitively demanding work window.
- The vanilla-tangerine flavor is bright and energizing — like a creamsicle.
- Do not take before bed, as this is an energizing formula.
- Pair with 5 minutes of focused intention-setting for your day.

Dietary Recommendations

- Eat protein at every meal — amino acids are the building blocks of neurotransmitters. *Eggs, fish, legumes, and nuts are ideal.*
- Add omega-3 fatty acids daily: wild salmon, sardines, walnuts, ground flaxseed, or chia seeds. *Your brain is 60% fat — feed it well.*
- Eat blueberries and dark berries regularly — *they contain anthocyanins that cross the blood-brain barrier and protect neurons.*
- Reduce alcohol — *even moderate consumption impairs neuroplasticity and worsens menopause brain fog.*

- Eat complex carbs (sweet potato, oats, quinoa) at lunch, not dinner. *They provide steady glucose for afternoon brain function.*

Your 7-Day Starter Plan

"One small step each day"

Day 1: Mix your first scoop of Magnolia Mind into cold water or a smoothie this morning. Notice the vanilla-citrus brightness.

Day 2: Write down 3 things you want to accomplish today BEFORE you start. Lion's mane supports focus — give it a clear target.

Day 3: Take a 20-minute walk outside. Cordyceps improves oxygen utilisation, and movement plus fresh air amplify cognitive benefits.

Day 4: Reduce sugar intake today. Blood sugar spikes worsen brain fog dramatically during menopause. Swap refined carbs for protein and healthy fats.

Day 5: Try a 5-minute 'brain dump' journal session. Write everything on your mind without editing. This clears working memory.

Day 6: Add omega-3 rich foods today: salmon, walnuts, flaxseed. Omega-3s support the same neural pathways that lion's mane and gotu kola nourish.

Day 7: Reflect on your week. Track your focus and energy levels on a 1–10 scale. Most women notice cognitive improvements within 10–14 days.

Magnolia — Personalized Protocol

Recommended for your type:

Magnolia Mind

Vanilla Tangerine — marine collagen peptides, ashwagandha, shatavari, schisandra, goji berry, white peony, hyaluronic acid, and biotin.
